**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 5, 7, 10-12, 14 and 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Grant et al. (WO 99/66494).

As to claim 1, Grant teaches a method for an improved lost frame recovery technique for concealing frame errors in frames to decoded where each frame comprises a plurality of parameter including spectral parameter, comprising the steps of:

Detecting whether the frame is bad (lost or erased) frame; and

Providing substitution for the LSP parameters of the bad frame by averaging the spectral parameter values of the good frames that are adjacent to the bad frames (Pg.8, lines 5-8; Pg.14, claims 1-2).

As to claims 2-3, 5 Grant teaches wherein classifying is made whether the bad frame is voiced or unvoiced frame (Pg.2, lines 20-30; Pg.14, claim 3).

As to claim 7, Grant teaches where error frames are reconstructed for concealing the error instead of substituting (Pg.4, lines 5-18).

Claims 10-12, 14 and 16 are analogous to claims 1-3 and are rejected for the foregoing reasons by Grant.

***Allowable Subject Matter***

Claims 9 and 18 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

the claims are allowable because Grant doesn't each the adaptive means as recited in the claims.

Claims 4, 6, 8, 13, 15 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nomura et al. (5,862,518)
